

ReBottle Wall

Vertical Growing and Resource Reuse

- LIFEWS AgriShine™ GrowMeal™ Primary 1-3 Teacher Training
- Audience: Primary 1-3 teachers, teaching assistants and garden facilitators
- Format: Self-paced online course + supervised practical orientation
- Recommended duration: 3 hours online + 60-90 minutes garden practical

Course Overview

Learning outcomes, materials and teacher readiness

- Learning outcomes: explain the garden's educational and production purpose; teach the ten course topics accurately; connect practical gardening to Primary 1-3 curriculum; supervise age-appropriate garden work; maintain simple records; assess learning through practical and classroom evidence.
- Core materials: teacher guide, crop/word/number cards as relevant, child-safe hand tools, watering equipment, labels, clipboards, rulers/measuring tools where relevant, observation/record sheets, clean harvest containers, handwashing supplies and first-aid access.
- Completion expectation: complete all modules, demonstrate one safe garden lesson, and submit a short lesson/assessment plan.

TEACHER PRACTICE

- Training sequence: EXPLAIN → DEMONSTRATE → PRACTISE → RECORD → REFLECT.

Vertical Growing Principles

Teacher knowledge and practical application

- Explain vertical growing as using upright space to support plant production.
- Identify container, support frame, growing medium, drainage and irrigation.
- Discuss space-saving benefits without claiming equal performance to ground beds for every crop.
- Observe how height affects access and watering.
- Keep child-access zones within safe reach.

TEACHER PRACTICE

- Prepare a labeled vertical-system orientation.

Safe ReBottle Preparation

Teacher knowledge and practical application

- Adults cut, drill, smooth and mount containers before pupil use.
- Use only clean containers approved for garden reuse and never containers that held hazardous substances.
- Inspect for sharp edges, cracks and degraded plastic.
- Secure every planter to a stable support.
- Provide drainage without creating slippery runoff.

TEACHER PRACTICE

- Teacher check: CLEAN • SMOOTH • SECURE
- DRAINING.

Growing Media

Teacher knowledge and practical application

- Use lightweight, clean growing media suitable for containers.
- Explain drainage and water-holding in simple terms.
- Do not overfill planters.
- Top up settled media as needed.
- Avoid contaminated soil and fresh manure.

TEACHER PRACTICE

- Prepare a media comparison sample.

Crop Selection

Teacher knowledge and practical application

- Choose compact crops suited to planter volume, sunlight and root depth.
- Use approved leafy vegetables, herbs or other small crops.
- Avoid heavy, thorny or highly vigorous crops that can destabilize the wall.
- Plan crop placement by light and access.
- Replace failed crops with appropriate alternatives.

TEACHER PRACTICE

- Select crops for upper and lower wall positions.

Planting Techniques

Teacher knowledge and practical application

- Plant into pre-prepared openings without damaging containers.
- Support roots gently and maintain appropriate depth.
- Label each section.
- Avoid overcrowding.
- Water after planting and inspect for media loss.

TEACHER PRACTICE

- Prepare a supervised planting station.

Watering Vertical Systems

Teacher knowledge and practical application

- Recognize that upper and lower containers may dry differently.
- Use the installed drip system or controlled hand watering.
- Check moisture at multiple levels.
- Avoid excessive runoff.
- Record recurring dry zones for maintenance.

TEACHER PRACTICE

- Demonstrate a top-middle-bottom moisture check.

Drainage

Teacher knowledge and practical application

- Explain that excess water needs a safe exit.
- Inspect drainage holes and collection channels for blockage.
- Prevent stagnant water and slippery pathways.
- Do not enlarge holes during pupil sessions.
- Observe drainage after watering.

TEACHER PRACTICE

- Prepare a simple drainage observation activity.

Maintenance

Teacher knowledge and practical application

- Inspect supports, containers, irrigation and drainage weekly.
- Replace damaged units promptly.
- Remove dead plant material and confirmed weeds.
- Keep labels readable.
- Record structural or watering problems for adult repair.

TEACHER PRACTICE

- Create a wall maintenance checklist.

Reuse and Resource Responsibility

Teacher knowledge and practical application

- Discuss safe reuse as one part of responsible material management.
- Distinguish reusable garden containers from contaminated waste.
- Encourage reduction, appropriate reuse and proper disposal/recycling where available.
- Keep the wall professional and hygienic rather than cluttered.
- Connect maintenance with responsibility.

TEACHER PRACTICE

- Prepare a safe-reuse sorting discussion.

Harvesting

Teacher knowledge and practical application

- Harvest only from stable, accessible positions.
- Do not allow pupils to climb or pull on the wall.
- Use clean containers and approved tools.
- Record harvest by wall section if useful.
- Follow food-safety procedures.

TEACHER PRACTICE

- Completion task: design a safe vertical-growing lesson.
