

QUESTION THE SYSTEM

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-251 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

GRAVITY INVESTIGATION

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-252 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

EVIDENCE MISSION: TEST

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-253 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

SAMPLE THE SYSTEM

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-254 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

GRAVITY INVESTIGATION

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-255 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-256 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-257 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

GRAVITY INVESTIGATION

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-258 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-259 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

RECOMMEND THE SYSTEM

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT container, timer, emitters

EVIDENCE flow rate, uniformity or water volume

GM-260 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.
