

JSS 1-3 Crop Rotation Garden Flashcards 661-680

661. ROTATION SYSTEM	A rotation system is a planned temporal sequence of crops designed around produc...
662. BOTANICAL FAMILY	Botanical family classification helps identify related crops that may share pest...
663. FUNCTIONAL GROUP	Crops can also be grouped by production function, rooting pattern, harvested org...
664. LEGUME PHASE	A legume phase can influence nitrogen cycling through symbiosis with nitrogen-fi...
665. NUTRIENT REMOVAL	Harvested crops remove nutrients from the production area in different quantitie...
666. NUTRIENT REPLENISHMENT	Rotation planning can be coordinated with residues, compost, legumes, and nutrie...
667. ROOTING DEPTH	Alternating crops with different rooting patterns can change how soil resources ...
668. PEST HOST	A host crop supports the feeding or reproduction of a particular pest.
669. HOST BREAK	A non-host crop can interrupt access to a preferred host and help reduce some pe...
670. DISEASE CARRYOVER	Some pathogens persist in soil or residues and can affect susceptible crops in l...
671. RESIDUE MANAGEMENT	Residue removal, incorporation, composting, or surface retention can affect soil...
672. SOIL COVER	Continuous or strategic soil cover can reduce erosion, suppress weeds, and influ...
673. ROTATION INTERVAL	Rotation interval is the time between susceptible crops or crop families returni...
674. SEASONAL FIT	A feasible rotation must match crop duration and requirements with seasonal prod...
675. CROP DURATION	Crop duration affects when land becomes available for the next crop and how many...
676. ROTATION DIVERSITY	Rotation diversity describes the variety of crop families, functions, and growth...
677. ROTATION RISK	Rotation risk includes pest, disease, nutrient, market, water, and timing constr...
678. ROTATION PERFORMANCE	Performance can be evaluated using yield, soil cover, pest incidence, input use,...
679. ROTATION RECORD	Detailed rotation records connect crop identity, family, dates, inputs, residues...
680. ROTATION MANAGEMENT	Rotation management uses historical evidence and production goals to select the ...
