

JSS 1-3

FOOD SMART CHALLENGE SYSTEM

FSC-301 to FSC-400

INVESTIGATE -> QUANTIFY -> EVALUATE -> DECIDE -> DEFEND

Purpose	Move learners from knowing facts to making evidence-based food, ingredient, resource and waste decisions.
Ten domains	Ingredients; food journeys; food choices; labels; meals; water; food waste; seasonality; storage/handling; food-system problem solving.
Evidence rule	Learners should show how they reached a decision. At higher levels, require data, criteria, uncertainty and trade-off reasoning.
Health/safety boundary	No medical or therapeutic claims. No tasting is required. School food-safety and allergy procedures take priority.
Resource connections	Use vocabulary, Ingredient Lab, Farm-to-Food activities, journals, mission cards and GrowMeal assessments as evidence sources.

CHALLENGE SET 01 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-301 - KNOW THE INGREDIENT

Scenario	The school is reviewing a school garden. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-302 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a classroom food table. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-303 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a harvest basket. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-304 - READ THE LABEL

Scenario	The school is reviewing a ingredient display. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-305 - PLAN A MEAL

Scenario	The school is reviewing a school lunch scenario. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-306 - USE WATER WISELY

Scenario	The school is reviewing a water station. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-307 - REDUCE FOOD WASTE

Scenario	The school is reviewing a storage shelf. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-308 - THINK SEASONALLY

Scenario	The school is reviewing a market basket. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-309 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a food journey map. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-310 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a school food-waste station. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 02 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-311 - KNOW THE INGREDIENT

Scenario	The school is reviewing a classroom food table. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-312 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a harvest basket. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-313 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a ingredient display. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-314 - READ THE LABEL

Scenario	The school is reviewing a school lunch scenario. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-315 - PLAN A MEAL

Scenario	The school is reviewing a water station. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-316 - USE WATER WISELY

Scenario	The school is reviewing a storage shelf. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-317 - REDUCE FOOD WASTE

Scenario	The school is reviewing a market basket. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-318 - THINK SEASONALLY

Scenario	The school is reviewing a food journey map. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-319 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a school food-waste station. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-320 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a school garden. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 03 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-321 - KNOW THE INGREDIENT

Scenario	The school is reviewing a harvest basket. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-322 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a ingredient display. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-323 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a school lunch scenario. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-324 - READ THE LABEL

Scenario	The school is reviewing a water station. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-325 - PLAN A MEAL

Scenario	The school is reviewing a storage shelf. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-326 - USE WATER WISELY

Scenario	The school is reviewing a market basket. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-327 - REDUCE FOOD WASTE

Scenario	The school is reviewing a food journey map. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-328 - THINK SEASONALLY

Scenario	The school is reviewing a school food-waste station. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-329 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a school garden. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-330 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a classroom food table. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 04 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-331 - KNOW THE INGREDIENT

Scenario	The school is reviewing a ingredient display. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-332 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a school lunch scenario. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-333 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a water station. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-334 - READ THE LABEL

Scenario	The school is reviewing a storage shelf. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-335 - PLAN A MEAL

Scenario	The school is reviewing a market basket. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-336 - USE WATER WISELY

Scenario	The school is reviewing a food journey map. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-337 - REDUCE FOOD WASTE

Scenario	The school is reviewing a school food-waste station. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-338 - THINK SEASONALLY

Scenario	The school is reviewing a school garden. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-339 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a classroom food table. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-340 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a harvest basket. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 05 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-341 - KNOW THE INGREDIENT

Scenario	The school is reviewing a school lunch scenario. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-342 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a water station. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-343 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a storage shelf. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-344 - READ THE LABEL

Scenario	The school is reviewing a market basket. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-345 - PLAN A MEAL

Scenario	The school is reviewing a food journey map. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-346 - USE WATER WISELY

Scenario	The school is reviewing a school food-waste station. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-347 - REDUCE FOOD WASTE

Scenario	The school is reviewing a school garden. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-348 - THINK SEASONALLY

Scenario	The school is reviewing a classroom food table. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-349 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a harvest basket. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-350 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a ingredient display. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 06 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-351 - KNOW THE INGREDIENT

Scenario	The school is reviewing a water station. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-352 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a storage shelf. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-353 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a market basket. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-354 - READ THE LABEL

Scenario	The school is reviewing a food journey map. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-355 - PLAN A MEAL

Scenario	The school is reviewing a school food-waste station. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-356 - USE WATER WISELY

Scenario	The school is reviewing a school garden. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-357 - REDUCE FOOD WASTE

Scenario	The school is reviewing a classroom food table. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-358 - THINK SEASONALLY

Scenario	The school is reviewing a harvest basket. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-359 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a ingredient display. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-360 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a school lunch scenario. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 07 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-361 - KNOW THE INGREDIENT

Scenario	The school is reviewing a storage shelf. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-362 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a market basket. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-363 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a food journey map. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-364 - READ THE LABEL

Scenario	The school is reviewing a school food-waste station. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-365 - PLAN A MEAL

Scenario	The school is reviewing a school garden. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-366 - USE WATER WISELY

Scenario	The school is reviewing a classroom food table. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-367 - REDUCE FOOD WASTE

Scenario	The school is reviewing a harvest basket. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-368 - THINK SEASONALLY

Scenario	The school is reviewing a ingredient display. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-369 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a school lunch scenario. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-370 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a water station. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 08 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-371 - KNOW THE INGREDIENT

Scenario	The school is reviewing a market basket. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-372 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a food journey map. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-373 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a school food-waste station. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-374 - READ THE LABEL

Scenario	The school is reviewing a school garden. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-375 - PLAN A MEAL

Scenario	The school is reviewing a classroom food table. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-376 - USE WATER WISELY

Scenario	The school is reviewing a harvest basket. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-377 - REDUCE FOOD WASTE

Scenario	The school is reviewing a ingredient display. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-378 - THINK SEASONALLY

Scenario	The school is reviewing a school lunch scenario. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-379 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a water station. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-380 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a storage shelf. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 09 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-381 - KNOW THE INGREDIENT

Scenario	The school is reviewing a food journey map. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-382 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a school food-waste station. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-383 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a school garden. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-384 - READ THE LABEL

Scenario	The school is reviewing a classroom food table. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-385 - PLAN A MEAL

Scenario	The school is reviewing a harvest basket. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-386 - USE WATER WISELY

Scenario	The school is reviewing a ingredient display. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-387 - REDUCE FOOD WASTE

Scenario	The school is reviewing a school lunch scenario. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-388 - THINK SEASONALLY

Scenario	The school is reviewing a water station. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-389 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a storage shelf. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-390 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a market basket. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 10 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-391 - KNOW THE INGREDIENT

Scenario	The school is reviewing a school food-waste station. You are assigned a know the ingredient problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-392 - BUILD A FOOD JOURNEY

Scenario	The school is reviewing a school garden. You are assigned a build a food journey problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-393 - MAKE A FOOD CHOICE

Scenario	The school is reviewing a classroom food table. You are assigned a make a food choice problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-394 - READ THE LABEL

Scenario	The school is reviewing a harvest basket. You are assigned a read the label problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-395 - PLAN A MEAL

Scenario	The school is reviewing a ingredient display. You are assigned a plan a meal problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-396 - USE WATER WISELY

Scenario	The school is reviewing a school lunch scenario. You are assigned a use water wisely problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-397 - REDUCE FOOD WASTE

Scenario	The school is reviewing a water station. You are assigned a reduce food waste problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-398 - THINK SEASONALLY

Scenario	The school is reviewing a storage shelf. You are assigned a think seasonally problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-399 - STORE & HANDLE RESPONSIBLY

Scenario	The school is reviewing a market basket. You are assigned a store & handle responsibly problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-400 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	The school is reviewing a food journey map. You are assigned a solve a food-system challenge problem that requires a defensible management decision.
Your challenge	Define criteria and variables, collect or interpret traceable data, quantify the relevant difference/loss/use, evaluate uncertainty and recommend an action with a trigger or threshold.
Evidence to submit	Problem statement, data/calculation, evaluation, uncertainty note and management recommendation.
Success criteria	Traceable evidence; quantitative reasoning; explicit criteria; qualified conclusion; actionable recommendation.
Extension	Conduct a sensitivity check: identify one assumption that could reverse the decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____
