

JSS 1-3 Intercropping Garden Flashcards 681-700

681. INTERCROPPING	Intercropping is the planned cultivation of two or more crop species in the same...
682. COMPONENT CROP	A component crop is one of the species deliberately included in an intercrop sys...
683. ROW INTERCROP	Row intercropping places component crops in distinct adjacent rows.
684. STRIP INTERCROP	Strip intercropping grows component crops in wider strips that remain close enou...
685. MIXED INTERCROP	Mixed intercropping combines crops without clearly separated rows.
686. SPATIAL ARRANGEMENT	Spatial arrangement determines where component crops occupy horizontal and verti...
687. TEMPORAL OVERLAP	Temporal overlap describes how long component crops grow together during the pro...
688. PLANT DENSITY	Intercrop density must account for the populations of all component crops rather...
689. CANOPY LAYER	Different crop heights and leaf arrangements can create vertical canopy layers.
690. ROOT COMPLEMENTARITY	Crops with different root distributions may explore soil resources differently i...
691. RESOURCE COMPETITION	Component crops may compete for light, water, nutrients, and space when demands ...
692. RESOURCE COMPLEMENTARITY	Complementarity occurs when component crops use resources differently enough to ...
693. LEGUME-CEREAL SYSTEM	Legume-cereal intercrops combine crops with contrasting growth and nutrient-acqu...
694. PEST INTERACTION	Crop diversity can alter pest movement, host finding, habitat, and natural-enemy...
695. WEED SUPPRESSION	A dense or layered intercrop canopy may reduce space and light available to some...
696. COMPONENT YIELD	Each component crop should be harvested and measured separately before combined ...
697. TOTAL OUTPUT	Total intercrop output combines the useful products from all component crops.
698. LAND EQUIVALENT RATIO	Land Equivalent Ratio compares the relative land area needed under sole crops to...
699. TRADE-OFF	A trade-off occurs when improvement in one component or objective is associated ...
700. INTERCROP EVALUATION	Intercrop evaluation considers arrangement, component yields, competition, compl...
