

QUESTION DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-301 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-302 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-303 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-304 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-305 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-306 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-307 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-308 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-309 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Production Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for establishment, growth and yield. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-310 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUESTION DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-311 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-312 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-313 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-314 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-315 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-316 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-317 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-318 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-319 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Raised Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for raised-system performance. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-320 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUESTION DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-321 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-322 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-323 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-324 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-325 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-326 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-327 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-328 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-329 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Grid Experiment Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for treatments, controls and fair comparisons. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-330 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUESTION DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-331 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-332 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-333 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-334 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-335 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-336 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-337 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-338 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-339 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Crop Rotation Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for crop-family sequence. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-340 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUESTION DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-341 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-342 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-343 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-344 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-345 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-346 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-347 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-348 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-349 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Intercropping Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for component crops and land-use efficiency. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-350 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUESTION DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-351 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-352 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-353 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-354 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-355 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-356 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-357 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-358 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-359 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Water-Smart Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for water movement and productivity. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-360 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUESTION DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-361 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-362 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-363 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-364 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-365 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-366 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-367 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-368 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-369 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Compost & Soil Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for compost and soil response. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-370 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUESTION DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-371 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-372 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-373 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-374 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-375 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-376 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-377 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-378 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-379 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-380 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUESTION DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-381 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-382 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-383 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-384 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-385 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-386 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-387 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-388 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-389 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Sensor-Ready Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for sensor quality and placement. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-390 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUESTION DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-391 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-392 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-393 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-394 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-395 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-396 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-397 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-398 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-399 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Applied Systems Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for stocks, flows, feedbacks and trade-offs. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-400 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.
