

Primary 1-3 FOOD SMART CHALLENGE SYSTEM

FSC-101 to FSC-200

IDENTIFY -> COMPARE -> CHOOSE -> EXPLAIN -> ACT

Purpose	Move learners from knowing facts to making evidence-based food, ingredient, resource and waste decisions.
Ten domains	Ingredients; food journeys; food choices; labels; meals; water; food waste; seasonality; storage/handling; food-system problem solving.
Evidence rule	Learners should show how they reached a decision. At higher levels, require data, criteria, uncertainty and trade-off reasoning.
Health/safety boundary	No medical or therapeutic claims. No tasting is required. School food-safety and allergy procedures take priority.
Resource connections	Use vocabulary, Ingredient Lab, Farm-to-Food activities, journals, mission cards and GrowMeal assessments as evidence sources.

CHALLENGE SET 01 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-101 - KNOW THE INGREDIENT

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-102 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-103 - MAKE A FOOD CHOICE

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-104 - READ THE LABEL

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-105 - PLAN A MEAL

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-106 - USE WATER WISELY

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-107 - REDUCE FOOD WASTE

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-108 - THINK SEASONALLY

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-109 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-110 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 02 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-111 - KNOW THE INGREDIENT

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-112 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-113 - MAKE A FOOD CHOICE

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-114 - READ THE LABEL

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-115 - PLAN A MEAL

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-116 - USE WATER WISELY

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-117 - REDUCE FOOD WASTE

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-118 - THINK SEASONALLY

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-119 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-120 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 03 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-121 - KNOW THE INGREDIENT

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-122 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-123 - MAKE A FOOD CHOICE

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-124 - READ THE LABEL

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-125 - PLAN A MEAL

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-126 - USE WATER WISELY

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-127 - REDUCE FOOD WASTE

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-128 - THINK SEASONALLY

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-129 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-130 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 04 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-131 - KNOW THE INGREDIENT

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-132 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-133 - MAKE A FOOD CHOICE

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-134 - READ THE LABEL

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-135 - PLAN A MEAL

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-136 - USE WATER WISELY

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-137 - REDUCE FOOD WASTE

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-138 - THINK SEASONALLY

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-139 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-140 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 05 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-141 - KNOW THE INGREDIENT

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-142 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-143 - MAKE A FOOD CHOICE

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-144 - READ THE LABEL

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-145 - PLAN A MEAL

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-146 - USE WATER WISELY

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-147 - REDUCE FOOD WASTE

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-148 - THINK SEASONALLY

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-149 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-150 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 06 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-151 - KNOW THE INGREDIENT

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-152 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-153 - MAKE A FOOD CHOICE

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-154 - READ THE LABEL

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-155 - PLAN A MEAL

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-156 - USE WATER WISELY

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-157 - REDUCE FOOD WASTE

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-158 - THINK SEASONALLY

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-159 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-160 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 07 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-161 - KNOW THE INGREDIENT

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-162 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-163 - MAKE A FOOD CHOICE

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-164 - READ THE LABEL

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-165 - PLAN A MEAL

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-166 - USE WATER WISELY

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-167 - REDUCE FOOD WASTE

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-168 - THINK SEASONALLY

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-169 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-170 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 08 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-171 - KNOW THE INGREDIENT

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-172 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-173 - MAKE A FOOD CHOICE

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-174 - READ THE LABEL

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-175 - PLAN A MEAL

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-176 - USE WATER WISELY

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-177 - REDUCE FOOD WASTE

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-178 - THINK SEASONALLY

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-179 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-180 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 09 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-181 - KNOW THE INGREDIENT

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-182 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-183 - MAKE A FOOD CHOICE

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-184 - READ THE LABEL

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-185 - PLAN A MEAL

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-186 - USE WATER WISELY

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-187 - REDUCE FOOD WASTE

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-188 - THINK SEASONALLY

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-189 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-190 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 10 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-191 - KNOW THE INGREDIENT

Scenario	Your group is working with a school food-waste station. You need to use what you learned from the garden to complete a know the ingredient decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-192 - BUILD A FOOD JOURNEY

Scenario	Your group is working with a school garden. You need to use what you learned from the garden to complete a build a food journey decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-193 - MAKE A FOOD CHOICE

Scenario	Your group is working with a classroom food table. You need to use what you learned from the garden to complete a make a food choice decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-194 - READ THE LABEL

Scenario	Your group is working with a harvest basket. You need to use what you learned from the garden to complete a read the label decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-195 - PLAN A MEAL

Scenario	Your group is working with a ingredient display. You need to use what you learned from the garden to complete a plan a meal decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-196 - USE WATER WISELY

Scenario	Your group is working with a school lunch scenario. You need to use what you learned from the garden to complete a use water wisely decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-197 - REDUCE FOOD WASTE

Scenario	Your group is working with a water station. You need to use what you learned from the garden to complete a reduce food waste decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-198 - THINK SEASONALLY

Scenario	Your group is working with a storage shelf. You need to use what you learned from the garden to complete a think seasonally decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-199 - STORE & HANDLE RESPONSIBLY

Scenario	Your group is working with a market basket. You need to use what you learned from the garden to complete a store & handle responsibly decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-200 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	Your group is working with a food journey map. You need to use what you learned from the garden to complete a solve a food-system challenge decision.
Your challenge	Identify the important information, compare at least two options, choose an action and explain your choice with one observation or measurement.
Evidence to submit	Short table, sequence, drawing, label comparison, tally or 2-3 sentence explanation.
Success criteria	Correct identification; usable evidence; reasonable choice; clear garden-to-food connection.
Extension	Suggest one way to make the choice reduce waste or protect resources.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.
