

## QUESTION THE SYSTEM

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-201 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## RAISED INVESTIGATION

PRIMARY 4-6 | Raised Food Garden

**Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-202 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-203 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Raised Food Garden

**Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-204 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## RAISED INVESTIGATION

PRIMARY 4-6 | Raised Food Garden

**Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-205 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-206 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-207 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## RAISED INVESTIGATION

PRIMARY 4-6 | Raised Food Garden

**Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-208 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-209 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## RECOMMEND THE SYSTEM

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, plants, bed

**EVIDENCE** height, spacing, moisture or harvest evidence

## GM-210 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

## QUESTION THE SYSTEM

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-211 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## GEOMETRY INVESTIGATION

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-212 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-213 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-214 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## GEOMETRY INVESTIGATION

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-215 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-216 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-217 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## GEOMETRY INVESTIGATION

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-218 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-219 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## RECOMMEND THE SYSTEM

PRIMARY 4-6 | Geometry Garden

Investigate shapes and garden spaces. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      beds, paths, containers

**EVIDENCE**          shape, side, corner or length

## GM-220 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using beds, paths, containers. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing shape, side, corner or length.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use shapes to describe. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Geometry Garden based on your measurements.

## QUESTION THE SYSTEM

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-221 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## GRID INVESTIGATION

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-222 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-223 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-224 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## GRID INVESTIGATION

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-225 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-226 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-227 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## GRID INVESTIGATION

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-228 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-229 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## RECOMMEND THE SYSTEM

PRIMARY 4-6 | Grid Experiment Garden

Investigate controlled garden comparisons. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      grid labels, ruler, data sheet

**EVIDENCE**          treatment/control response

## GM-230 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using grid labels, ruler, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing treatment/control response.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep treatments identifiable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Grid Experiment Garden based on your measurements.

## QUESTION THE SYSTEM

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-231 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## KEYHOLE INVESTIGATION

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-232 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-233 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-234 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## KEYHOLE INVESTIGATION

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-235 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-236 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-237 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## KEYHOLE INVESTIGATION

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-238 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-239 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## RECOMMEND THE SYSTEM

PRIMARY 4-6 | Keyhole Garden

**Investigate keyhole-bed access and resource flow. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      tape, bed map, observation sheet

**EVIDENCE**          reach, moisture, area or compost evidence

## GM-240 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using tape, bed map, observation sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing reach, moisture, area or compost evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid stepping into the bed. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Keyhole Garden based on your measurements.

## QUESTION THE SYSTEM

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-241 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## COMPOST INVESTIGATION

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-242 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-243 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-244 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## COMPOST INVESTIGATION

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-245 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-246 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-247 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## COMPOST INVESTIGATION

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-248 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-249 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## RECOMMEND THE SYSTEM

PRIMARY 4-6 | Compost Garden

**Investigate decomposition and compost management. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      compost pile, thermometer if approved, data sheet

**EVIDENCE**          temperature, moisture, volume or maturity evidence

## GM-250 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using compost pile, thermometer if approved, data sheet. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing temperature, moisture, volume or maturity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Teacher supervises pile handling. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Compost Garden based on your measurements.

## QUESTION THE SYSTEM

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**          flow rate, uniformity or water volume

## GM-251 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## GRAVITY INVESTIGATION

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**        flow rate, uniformity or water volume

## GM-252 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**      flow rate, uniformity or water volume

## GM-253 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**          flow rate, uniformity or water volume

## GM-254 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## GRAVITY INVESTIGATION

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**        flow rate, uniformity or water volume

## GM-255 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**          flow rate, uniformity or water volume

## GM-256 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**          flow rate, uniformity or water volume

## GM-257 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## GRAVITY INVESTIGATION

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**      flow rate, uniformity or water volume

## GM-258 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**          flow rate, uniformity or water volume

## GM-259 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## RECOMMEND THE SYSTEM

PRIMARY 4-6 | Gravity Drip Garden

Investigate gravity-fed irrigation. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      container, timer, emitters

**EVIDENCE**          flow rate, uniformity or water volume

## GM-260 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using container, timer, emitters. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow rate, uniformity or water volume.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not disconnect lines without approval. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Gravity Drip Garden based on your measurements.

## QUESTION THE SYSTEM

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-261 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## VERTICAL INVESTIGATION

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-262 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-263 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-264 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## VERTICAL INVESTIGATION

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-265 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-266 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-267 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## VERTICAL INVESTIGATION

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-268 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-269 - MISSION PATH

**DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.

**PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.

**SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.

**SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## RECOMMEND THE SYSTEM

PRIMARY 4-6 | Vertical Garden

Investigate multi-level production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT** ruler, level map, plants

**EVIDENCE** growth, light, moisture or footprint evidence

## GM-270 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using ruler, level map, plants. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing growth, light, moisture or footprint evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Keep structure stable. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Vertical Garden based on your measurements.

## QUESTION THE SYSTEM

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-271 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## CROP INVESTIGATION

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-272 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-273 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-274 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## CROP INVESTIGATION

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-275 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-276 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-277 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## CROP INVESTIGATION

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-278 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-279 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## RECOMMEND THE SYSTEM

PRIMARY 4-6 | Crop Rotation Garden

Investigate rotation planning and soil-cover logic. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      bed history, crop-family records

**EVIDENCE**          family sequence, interval or cover evidence

## GM-280 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using bed history, crop-family records. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing family sequence, interval or cover evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Document prior crops correctly. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Crop Rotation Garden based on your measurements.

## QUESTION THE SYSTEM

PRIMARY 4-6 | Water-Smart Garden

**Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      measuring container, timer, ruler

**EVIDENCE**      infiltration, applied water, runoff or productivity evidence

## GM-281 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

## WATER-SMART INVESTIGATION

PRIMARY 4-6 | Water-Smart Garden

**Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      measuring container, timer, ruler

**EVIDENCE**      infiltration, applied water, runoff or productivity evidence

## GM-282 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Water-Smart Garden

**Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      measuring container, timer, ruler

**EVIDENCE**      infiltration, applied water, runoff or productivity evidence

## GM-283 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Water-Smart Garden

**Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      measuring container, timer, ruler

**EVIDENCE**      infiltration, applied water, runoff or productivity evidence

## GM-284 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

## RECOMMEND THE SYSTEM

PRIMARY 4-6 | Water-Smart Garden

**Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.**

**MISSION KIT**      measuring container, timer, ruler

**EVIDENCE**      infiltration, applied water, runoff or productivity evidence

## GM-290 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

## QUESTION THE SYSTEM

PRIMARY 4-6 | Intro Soilless Garden

Investigate introductory soilless production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      reservoir/system map, approved meter

**EVIDENCE**          flow, pH, EC or root-zone evidence

## GM-291 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using reservoir/system map, approved meter. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow, pH, EC or root-zone evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not taste or touch nutrient solution. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Intro Soilless Garden based on your measurements.

## INTRO INVESTIGATION

PRIMARY 4-6 | Intro Soilless Garden

Investigate introductory soilless production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      reservoir/system map, approved meter

**EVIDENCE**          flow, pH, EC or root-zone evidence

## GM-292 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using reservoir/system map, approved meter. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow, pH, EC or root-zone evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not taste or touch nutrient solution. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Intro Soilless Garden based on your measurements.

## EVIDENCE MISSION: TEST

PRIMARY 4-6 | Intro Soilless Garden

Investigate introductory soilless production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      reservoir/system map, approved meter

**EVIDENCE**          flow, pH, EC or root-zone evidence

## GM-293 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using reservoir/system map, approved meter. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow, pH, EC or root-zone evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Do not taste or touch nutrient solution. Follow teacher instructions and school garden safety rules.

### AGRISHINE TASK

Recommend one practical improvement to the Intro Soilless Garden based on your measurements.

## SAMPLE THE SYSTEM

PRIMARY 4-6 | Intro Soilless Garden

Investigate introductory soilless production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

**MISSION KIT**      reservoir/system map, approved meter

**EVIDENCE**          flow, pH, EC or root-zone evidence

## GM-294 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using reservoir/system map, approved meter. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing flow, pH, EC or root-zone evidence.
