

SSS 1-3 Integrated Food Systems Laboratory Flashcards 981-1000

981. FOOD-ENERGY-WATER SYSTEM	A food-energy-water system represents interacting production, energy, and water ...
982. INTERDEPENDENCE	Interdependence means the condition or performance of one subsystem depends part...
983. RESOURCE NEXUS	A resource nexus perspective evaluates linked resource flows and decisions rathe...
984. MATERIAL FLOW	Material-flow analysis tracks physical quantities entering, moving through, accu...
985. ENERGY FLOW	Energy-flow analysis tracks energy supply, conversion, storage, demand, losses, ...
986. WATER FLOW	Water-flow analysis tracks source, storage, conveyance, irrigation, soil storage...
987. MASS BALANCE	A mass balance applies conservation: accumulation equals inputs minus outputs pl...
988. ENERGY BALANCE	An energy balance accounts for energy entering, stored, converted, used, and los...
989. STORAGE	Storage decouples the timing of resource supply and demand, such as water tanks,...
990. DEMAND PROFILE	A demand profile describes how resource or service requirements vary through time.
991. SUPPLY PROFILE	A supply profile describes how available resource supply changes through time an...
992. RESOURCE ALLOCATION	Resource allocation assigns limited water, energy, labor, or storage capacity am...
993. CRITICAL LOAD	A critical load or service has high priority because interruption creates unacce...
994. SYSTEM CONSTRAINT	Integrated constraints include limited water, energy, storage, pumping capacity,...
995. CASCADE EFFECT	A cascade occurs when a change or failure in one subsystem propagates through de...
996. TRADE-OFF	Integrated decisions can create trade-offs among production, water use, energy d...
997. SYNERGY	A synergy occurs when coordinated management improves more than one subsystem ob...
998. SYSTEM MODEL	A system model is a simplified representation of components, states, flows, rela...
999. SCENARIO ANALYSIS	Scenario analysis evaluates system performance under alternative resource, deman...
1000. INTEGRATED DECISION SYSTEM	An integrated decision system combines measurements, models, constraints, object...
