

SSS 1-3 Smart Irrigation Demonstrator • Practical Activity Cards

Progression: DESIGN → INSTRUMENT → MODEL → EVALUATE → OPTIMIZE

PA-471 Define State and Control Variables	Complete the investigation using explicit assumptions, systematic measurements, and...
PA-472 Design Threshold Control	Define the objective, boundary, variables, constraints, and performance criteria. D...
PA-473 Design Hysteresis Control	Define the objective, boundary, variables, constraints, and performance criteria. D...
PA-474 Map a Feedback Loop	Complete the investigation using explicit assumptions, systematic measurements, and...
PA-475 Add a Feedforward Input	Complete the investigation using explicit assumptions, systematic measurements, and...
PA-476 Verify Irrigation Flow	Complete the investigation using explicit assumptions, systematic measurements, and...
PA-477 Apply a Tank-Level Constraint	Complete the investigation using explicit assumptions, systematic measurements, and...
PA-478 Diagnose a Control Fault	Identify the abnormal signal or performance pattern, formulate plausible causes, te...
PA-479 Compare Benchmark and Adaptive Control	Use quantitative evidence and stated criteria. Compare alternatives or conditions, ...
PA-480 Evaluate Smart-Irrigation Performance	Use quantitative evidence and stated criteria. Compare alternatives or conditions, ...
