

SSS 1-3 Water Productivity Garden • Practical Activity Cards

Progression: DESIGN → INSTRUMENT → MODEL → EVALUATE → OPTIMIZE

- PA-441 Construct a Water Balance** Define the objective, boundary, variables, constraints, and performance criteria. D...
- PA-442 Estimate Crop Evapotranspiration** Use the specified measurements, equation, and assumptions. Show units throughout, c...
- PA-443 Calculate Irrigation Requirement** Use the specified measurements, equation, and assumptions. Show units throughout, c...
- PA-444 Quantify Soil-Water Storage Change** Use the specified measurements, equation, and assumptions. Show units throughout, c...
- PA-445 Calculate Irrigation Water Productivity** Use the specified measurements, equation, and assumptions. Show units throughout, c...
- PA-446 Calculate ET Water Productivity** Use the specified measurements, equation, and assumptions. Show units throughout, c...
- PA-447 Estimate Marginal Water Productivity** Use the specified measurements, equation, and assumptions. Show units throughout, c...
- PA-448 Evaluate Deficit Irrigation** Use quantitative evidence and stated criteria. Compare alternatives or conditions, ...
- PA-449 Analyze Yield Response to Water** Use quantitative evidence and stated criteria. Compare alternatives or conditions, ...
- PA-450 Optimize Water Allocation** Define the objective and constraints, compare feasible alternatives, and select a s...
