

FRAME DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to frame using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

TD-491 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DESIGN DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to design using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

INSTRUMENT DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to instrument using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

CALIBRATE DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to calibrate using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MODEL DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to model using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

TD-495 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

VALIDATE DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to validate using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

TD-496 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

EVALUATE DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to evaluate using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

OPTIMIZE DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to optimize using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

STRESS-TEST DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to stress-test using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

SSS 1-3 | Integrated Food Systems Laboratory

SET UP

Specify objective, system boundary, performance metric, assumptions, constraints, acceptance criteria and QC for integrated system behavior.

DEMONSTRATE

Demonstrate how to recommend using the protocol, instrument/reference IDs, traceable data and validation/QC requirements.

ASK

What decision must this evidence support? Which assumption matters? How is quality checked? What trade-off limits optimization?

TD-500 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check reproducibility, calibration/reference evidence, calculations/models, uncertainty, validation and technical reasoning.

CHECK LEARNING

Student produces technically defensible evidence that supports a design, operational or optimization decision.

CLOSE

Document limitations and corrective actions, secure systems, and define the next validation, sensitivity or prototype test.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.
