

Sack & Grow-Bag Garden

Container Crop Production

- LIFEWS AgriShine™ GrowMeal™ Primary 1-3 Teacher Training
- Audience: Primary 1-3 teachers, teaching assistants and garden facilitators
- Format: Self-paced online course + supervised practical orientation
- Recommended duration: 3 hours online + 60-90 minutes garden practical

Course Overview

Learning outcomes, materials and teacher readiness

- Learning outcomes: explain the garden's educational and production purpose; teach the ten course topics accurately; connect practical gardening to Primary 1-3 curriculum; supervise age-appropriate garden work; maintain simple records; assess learning through practical and classroom evidence.
- Core materials: teacher guide, crop/word/number cards as relevant, child-safe hand tools, watering equipment, labels, clipboards, rulers/measuring tools where relevant, observation/record sheets, clean harvest containers, handwashing supplies and first-aid access.
- Completion expectation: complete all modules, demonstrate one safe garden lesson, and submit a short lesson/assessment plan.

TEACHER PRACTICE

- Training sequence: EXPLAIN → DEMONSTRATE → PRACTISE → RECORD → REFLECT.

Sack and Grow-Bag Systems

Teacher knowledge and practical application

- Compare sacks, grow-bags and ground beds as different production containers.
- Identify container, growing medium, drainage and planting zone.
- Discuss when containers are useful, such as limited or unsuitable ground space.
- Inspect stability and material condition.
- Keep access paths clear.

TEACHER PRACTICE

- Prepare a system-comparison orientation.

Container Size and Crop Choice

Teacher knowledge and practical application

- Match crop rooting and mature size to container volume.
- Avoid placing large crops in undersized bags.
- Consider sunlight, stability and watering demand.
- Use the approved crop plan.
- Explain that bigger containers generally hold more growing medium but still require management.

TEACHER PRACTICE

- Match four crops to suitable container sizes.

Growing Media

Teacher knowledge and practical application

- Use clean, well-draining media appropriate to the crop.
- Explain the roles of air, water and root support.
- Avoid compacting bags excessively.
- Top up media if settling exposes roots.
- Use mature, approved amendments only.

TEACHER PRACTICE

- Prepare a simple media demonstration.

Planting

Teacher knowledge and practical application

- Open planting holes at appropriate positions.
- Sow or transplant at correct depth and spacing.
- Support seedlings gently.
- Label crop and date.
- Water after planting without eroding media.

TEACHER PRACTICE

- Prepare one grow-bag planting demonstration.

Water Management

Teacher knowledge and practical application

- Containers can dry faster than ground soil, so check moisture regularly.
- Water according to crop and container needs rather than a fixed amount for all bags.
- Ensure drainage works.
- Avoid standing water around bags.
- Compare moisture at different container positions.

TEACHER PRACTICE

- Teach CHECK → WATER → DRAIN → RECHECK.

Plant Nutrition Basics

Teacher knowledge and practical application

- Explain that plants require nutrients as well as water and light.
- Use only amendments/fertilizers approved by the school garden plan.
- Avoid pupil handling of concentrated fertilizers.
- Observe growth and records rather than guessing nutrient deficiency from one symptom.
- Apply materials at correct rates under adult supervision.

TEACHER PRACTICE

- Review the garden's approved nutrition plan.

Comparing Container Growth

Teacher knowledge and practical application

- Compare similar crops grown in different containers using height, leaf number or harvest measurements.
- Keep other conditions as similar as practical when comparison is the goal.
- Do not claim container type caused a difference without considering other factors.
- Record date and measurement method.
- Use findings to generate questions.

TEACHER PRACTICE

- Prepare a two-container comparison.

Maintenance

Teacher knowledge and practical application

- Inspect bags for tears, tipping and blocked drainage.
- Remove confirmed weeds and dead material.
- Maintain irrigation and labels.
- Replace damaged containers before failure.
- Keep paths clean and bags upright.

TEACHER PRACTICE

- Create a weekly container checklist.

Harvesting

Teacher knowledge and practical application

- Identify readiness for each crop.
- Harvest without pulling or tipping the container.
- Use clean baskets and approved tools.
- Record counts or mass.
- Follow food-safety procedures.

TEACHER PRACTICE

- Prepare a harvest-and-record station.

Student Activities

Teacher knowledge and practical application

- Use planting, moisture checks, growth measurement, container comparison, harvest math and observation journals.
- Assign clear roles within small groups.
- Keep one learning objective per activity.
- Rotate tasks to broaden participation.
- End with a short evidence-based reflection.

TEACHER PRACTICE

- Completion task: design a 35-minute container-production activity.
