

Ground Production Garden

Introduction to Field Production

- LIFEWS AgriShine™ GrowMeal™ Primary 1-3 Teacher Training
- Audience: Primary 1-3 teachers, teaching assistants and garden facilitators
- Format: Self-paced online course + supervised practical orientation
- Recommended duration: 3 hours online + 60-90 minutes garden practical

Course Overview

Learning outcomes, materials and teacher readiness

- Learning outcomes: explain the garden's educational and production purpose; teach the ten course topics accurately; connect practical gardening to Primary 1-3 curriculum; supervise age-appropriate garden work; maintain simple records; assess learning through practical and classroom evidence.
- Core materials: teacher guide, crop/word/number cards as relevant, child-safe hand tools, watering equipment, labels, clipboards, rulers/measuring tools where relevant, observation/record sheets, clean harvest containers, handwashing supplies and first-aid access.
- Completion expectation: complete all modules, demonstrate one safe garden lesson, and submit a short lesson/assessment plan.

TEACHER PRACTICE

- Training sequence: EXPLAIN → DEMONSTRATE → PRACTISE → RECORD → REFLECT.

Preparing the Ground

Teacher knowledge and practical application

- Inspect and clear the designated plot using safe adult-led methods.
- Loosen and level soil as appropriate to the crop and site.
- Mark paths before pupils enter production rows.
- Use mature approved soil amendments only.
- Heavy digging and hazardous tools remain adult tasks.

TEACHER PRACTICE

- Prepare a safe plot-preparation demonstration.

Crop Selection

Teacher knowledge and practical application

- Choose crops suited to season, site, available water and learning goals.
- Consider time to harvest and school calendar.
- Use locally appropriate crops and approved varieties.
- Avoid planting more than the class can maintain.
- Plan diversity without creating unmanageable complexity.

TEACHER PRACTICE

- Prepare a simple seasonal crop plan.

Row Formation

Teacher knowledge and practical application

- Explain rows as organized planting lines that support spacing, access and management.
- Mark straight or contour-appropriate rows according to site design.
- Keep paths wide enough for pupils.
- Avoid unnecessary soil disturbance.
- Use string lines under supervision.

TEACHER PRACTICE

- Demonstrate one row and path layout.

Plant Spacing

Teacher knowledge and practical application

- Use crop-specific within-row and between-row spacing.
- Mark positions before planting.
- Explain how overcrowding can affect growth and access.
- Count plants after establishment.
- Replace missing plants only when agronomically appropriate.

TEACHER PRACTICE

- Prepare a spacing guide for the selected crop.

Sowing and Transplanting

Teacher knowledge and practical application

- Compare direct sowing and transplanting.
- Demonstrate depth, seed placement and gentle seedling handling.
- Label rows and dates.
- Water after planting as required.
- Protect newly planted areas from trampling.

TEACHER PRACTICE

- Prepare one sowing row and one transplant row.

Water Management

Teacher knowledge and practical application

- Identify water source and irrigation method.
- Check soil moisture and crop stage before watering.
- Apply water to root zones efficiently.
- Maintain channels, hoses or drip lines.
- Record major watering events where practical.

TEACHER PRACTICE

- Prepare a watering inspection routine.

Weed and Pest Management

Teacher knowledge and practical application

- Identify weeds before removal.
- Scout regularly for crop damage and visible pests.
- Use non-chemical and other approved management methods under the school garden plan.
- Pupils do not handle pesticides.
- Record observations before deciding on action.

TEACHER PRACTICE

- Create a simple scouting sheet.

Crop Maintenance

Teacher knowledge and practical application

- Combine weeding, mulching, staking, thinning or other crop-specific tasks.
- Use safe tools and clear roles.
- Maintain row labels and paths.
- Remove damaged material according to garden procedures.
- Record important maintenance events.

TEACHER PRACTICE

- Prepare a weekly maintenance rota.

Harvesting

Teacher knowledge and practical application

- Determine readiness using crop-specific indicators.
- Demonstrate correct harvest technique.
- Use clean containers.
- Minimize crop damage and field losses.
- Record harvest quantity and destination.

TEACHER PRACTICE

- Prepare a safe harvest workflow.

Production Records

Teacher knowledge and practical application

- Record crop, variety if known, planting date, plot/row, key care activities and harvest.
- Use simple tables appropriate to Primary 1-3.
- Keep measurement units consistent.
- Use records to discuss what happened during the crop cycle.
- Store records for future class comparison.

TEACHER PRACTICE

- Completion task: design a simple field-production record and lesson.
