

QUESTION THE SYSTEM

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-201 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

RAISED INVESTIGATION

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-202 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

EVIDENCE MISSION: TEST

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-203 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

SAMPLE THE SYSTEM

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-204 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

RAISED INVESTIGATION

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-205 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-206 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-207 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

RAISED INVESTIGATION

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-208 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-209 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Raised Food Garden based on your measurements.

RECOMMEND THE SYSTEM

PRIMARY 4-6 | Raised Food Garden

Investigate raised-bed production. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT ruler, plants, bed

EVIDENCE height, spacing, moisture or harvest evidence

GM-210 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using ruler, plants, bed. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing height, spacing, moisture or harvest evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Use tools safely. Follow teacher instructions and school garden safety rules.
