

QUESTION THE SYSTEM

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-281 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Question using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

WATER-SMART INVESTIGATION

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-282 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Measure using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

EVIDENCE MISSION: TEST

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-283 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Test using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

SAMPLE THE SYSTEM

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-284 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Sample using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

WATER-SMART INVESTIGATION

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-285 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Calculate using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

EVIDENCE MISSION: GRAPH

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-286 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Graph using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

DIAGNOSE THE SYSTEM

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-287 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Diagnose using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

WATER-SMART INVESTIGATION

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-288 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Compare using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

EVIDENCE MISSION: IMPROVE

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-289 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Improve using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.

RECOMMEND THE SYSTEM

PRIMARY 4-6 | Water-Smart Garden

Investigate water movement and productivity. Ask a testable question, collect comparable measurements, and make an evidence-based explanation.

MISSION KIT measuring container, timer, ruler

EVIDENCE infiltration, applied water, runoff or productivity evidence

GM-290 - MISSION PATH

- DO** 1. State the question. 2. Choose samples or comparison points. 3. Recommend using measuring container, timer, ruler. 4. Record repeated evidence. 5. Calculate or graph where useful. 6. Explain the result and one limitation.
- PROVE** Provide a labeled data table plus a graph, calculation or comparison showing infiltration, applied water, runoff or productivity evidence.
- SUCCESS** The method is repeatable, units are shown, the conclusion matches the evidence, and one limitation is identified.
- SAFETY** Avoid slippery wet areas. Follow teacher instructions and school garden safety rules.

AGRISHINE TASK

Recommend one practical improvement to the Water-Smart Garden based on your measurements.
