

JSS 1-3 Production Garden Flashcards 601-620

601. PRODUCTION SYSTEM	A crop production system combines land or growing space, inputs, management, lab...
602. PRODUCTION OBJECTIVE	A production objective states the measurable result a grower intends to achieve,...
603. CROP REQUIREMENT	Crop requirements include suitable water, nutrients, rooting conditions, light, ...
604. LAND PREPARATION	Land preparation creates suitable physical conditions for establishment, root gr...
605. PLANT POPULATION	Plant population is the number of crop plants established within a defined produ...
606. PLANT DENSITY	Plant density expresses the number of plants per unit area and is influenced by ...
607. ESTABLISHMENT RATE	Establishment rate compares the number of successfully established plants with t...
608. CROP GROWTH RATE	Repeated measurements can be used to describe how rapidly crop size or biomass i...
609. CROP DEVELOPMENT	Development describes progression through stages such as emergence, vegetative g...
610. FIELD UNIFORMITY	Field uniformity describes how similar crop establishment, growth, and condition...
611. INPUT	Inputs include seed, water, nutrients, growing materials, energy, labor, tools, ...
612. OUTPUT	Outputs include harvested produce as well as residues, data, and other products ...
613. CROP LOSS	Crop loss is the reduction in expected production caused by failed establishment...
614. FIELD SCOUTING	Field scouting is systematic observation of crop condition and production constr...
615. HARVEST INDEX	Harvest records quantify the useful crop material collected from a defined area ...
616. YIELD	Yield is the quantity of harvested product per unit area, plant, or production c...
617. QUALITY	Crop quality can be evaluated using defined attributes such as size, appearance,...
618. PRODUCTION EFFICIENCY	Production efficiency compares useful output with one or more inputs used to obt...
619. PRODUCTION RECORD	Production records document dates, inputs, operations, observations, measurement...
620. PRODUCTION ANALYSIS	Production analysis integrates crop performance, inputs, losses, yield, quality,...
