

JSS 1-3 Water Smart Garden Flashcards 701-720

701. SOIL-WATER SYSTEM	Crop water management links water supply, soil storage, root uptake, atmospheric...
702. SOIL MOISTURE CONTENT	Soil moisture content quantifies water held in the soil and can be measured or e...
703. FIELD CAPACITY	Field capacity is the soil-water condition after excess gravitational water has ...
704. WILTING POINT	Permanent wilting point is a low soil-water condition at which plants cannot rec...
705. AVAILABLE WATER	Plant-available water is the portion of stored soil water between field capacity...
706. ROOT-ZONE STORAGE	Root-zone water storage depends on soil properties, water content, and effective...
707. INFILTRATION RATE	Infiltration rate is the rate at which water enters the soil surface under speci...
708. PERCOLATION	Percolation is downward water movement through soil below the wetted or root zone.
709. RUNOFF	Runoff is surface water movement away from the intended application area.
710. EVAPOTRANSPIRATION	Evapotranspiration combines evaporation from surfaces and transpiration from pla...
711. CROP WATER USE	Crop water use changes with growth stage, canopy, weather, rooting, and management.
712. IRRIGATION REQUIREMENT	Irrigation requirement is the amount of supplemental water needed after consider...
713. APPLICATION RATE	Application rate describes irrigation depth or volume delivered per unit time or...
714. IRRIGATION EFFICIENCY	Irrigation efficiency compares useful water delivery or storage with the water s...
715. DISTRIBUTION UNIFORMITY	Distribution uniformity describes how evenly an irrigation system delivers water...
716. SOIL-MOISTURE THRESHOLD	A threshold is a defined soil-moisture condition used to trigger or delay irriga...
717. IRRIGATION SCHEDULING	Scheduling determines when irrigation occurs and how much water is applied using...
718. WATER PRODUCTIVITY	Water productivity relates useful crop output to the quantity of water consumed ...
719. WATER BALANCE	A water balance accounts for inputs, outputs, and changes in stored water within...
720. WATER MANAGEMENT DECISION	Water management decisions integrate monitoring, crop need, system performance, ...
