

Primary 1-3 FARM-TO-FOOD ACTIVITY SYSTEM

FF-101 to FF-200

GROW -> OBSERVE -> HARVEST -> SORT -> CONNECT TO FOOD

Purpose	Connect school-garden learning to food origin, harvest, handling, quality, preparation pathways, food literacy and waste reduction.
Food-safety boundary	These are education activities, not authorization for unrestricted tasting or processing. School food-safety rules and teacher supervision take priority.
Core learning chain	GARDEN -> CROP -> HARVEST -> HANDLE -> SORT/MEASURE -> PREPARE/PROCESS PATHWAY -> FOOD -> CHOICE -> WASTE/RESOURCE
Connections	Use with GrowMeal practical cards, journals, mission cards, vocabulary and assessment items.

GARDEN 01 - Alphabet Food Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-101 - FOOD ORIGIN

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-102 - HARVEST READINESS

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-103 - SAFE HANDLING

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-104 - SORTING & QUALITY

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-105 - FARM-TO-FOOD JOURNEY

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-106 - MEASUREMENT & YIELD

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-107 - STORAGE & LOSS

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-108 - PREPARATION PATHWAY

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-109 - FOOD CHOICE & LITERACY

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-110 - WASTE-TO-RESOURCE

Garden	Alphabet Food Garden
Learning objective	Use the Alphabet Food Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 02 - Number Food Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-111 - FOOD ORIGIN

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-112 - HARVEST READINESS

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-113 - SAFE HANDLING

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-114 - SORTING & QUALITY

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-115 - FARM-TO-FOOD JOURNEY

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-116 - MEASUREMENT & YIELD

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-117 - STORAGE & LOSS

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-118 - PREPARATION PATHWAY

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-119 - FOOD CHOICE & LITERACY

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-120 - WASTE-TO-RESOURCE

Garden	Number Food Garden
Learning objective	Use the Number Food Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 03 - Geometry Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-121 - FOOD ORIGIN

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-122 - HARVEST READINESS

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-123 - SAFE HANDLING

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-124 - SORTING & QUALITY

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-125 - FARM-TO-FOOD JOURNEY

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-126 - MEASUREMENT & YIELD

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-127 - STORAGE & LOSS

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-128 - PREPARATION PATHWAY

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-129 - FOOD CHOICE & LITERACY

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-130 - WASTE-TO-RESOURCE

Garden	Geometry Garden
Learning objective	Use the Geometry Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 04 - Leaf Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-131 - FOOD ORIGIN

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-132 - HARVEST READINESS

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-133 - SAFE HANDLING

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-134 - SORTING & QUALITY

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-135 - FARM-TO-FOOD JOURNEY

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-136 - MEASUREMENT & YIELD

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-137 - STORAGE & LOSS

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-138 - PREPARATION PATHWAY

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-139 - FOOD CHOICE & LITERACY

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-140 - WASTE-TO-RESOURCE

Garden	Leaf Garden
Learning objective	Use the Leaf Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 05 - Pollinator Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-141 - FOOD ORIGIN

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-142 - HARVEST READINESS

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-143 - SAFE HANDLING

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-144 - SORTING & QUALITY

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-145 - FARM-TO-FOOD JOURNEY

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-146 - MEASUREMENT & YIELD

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-147 - STORAGE & LOSS

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-148 - PREPARATION PATHWAY

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-149 - FOOD CHOICE & LITERACY

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-150 - WASTE-TO-RESOURCE

Garden	Pollinator Garden
Learning objective	Use the Pollinator Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 06 - Raised Food Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-151 - FOOD ORIGIN

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-152 - HARVEST READINESS

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-153 - SAFE HANDLING

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-154 - SORTING & QUALITY

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-155 - FARM-TO-FOOD JOURNEY

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-156 - MEASUREMENT & YIELD

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-157 - STORAGE & LOSS

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-158 - PREPARATION PATHWAY

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-159 - FOOD CHOICE & LITERACY

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-160 - WASTE-TO-RESOURCE

Garden	Raised Food Garden
Learning objective	Use the Raised Food Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 07 - ReBottle Wall Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-161 - FOOD ORIGIN

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-162 - HARVEST READINESS

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-163 - SAFE HANDLING

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-164 - SORTING & QUALITY

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-165 - FARM-TO-FOOD JOURNEY

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-166 - MEASUREMENT & YIELD

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-167 - STORAGE & LOSS

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-168 - PREPARATION PATHWAY

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-169 - FOOD CHOICE & LITERACY

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-170 - WASTE-TO-RESOURCE

Garden	ReBottle Wall Garden
Learning objective	Use the ReBottle Wall Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 08 - Sack GrowBag Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-171 - FOOD ORIGIN

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-172 - HARVEST READINESS

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-173 - SAFE HANDLING

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-174 - SORTING & QUALITY

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-175 - FARM-TO-FOOD JOURNEY

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-176 - MEASUREMENT & YIELD

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-177 - STORAGE & LOSS

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-178 - PREPARATION PATHWAY

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-179 - FOOD CHOICE & LITERACY

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-180 - WASTE-TO-RESOURCE

Garden	Sack GrowBag Garden
Learning objective	Use the Sack GrowBag Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 09 - Ground Production Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-181 - FOOD ORIGIN

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-182 - HARVEST READINESS

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-183 - SAFE HANDLING

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-184 - SORTING & QUALITY

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-185 - FARM-TO-FOOD JOURNEY

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-186 - MEASUREMENT & YIELD

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-187 - STORAGE & LOSS

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-188 - PREPARATION PATHWAY

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-189 - FOOD CHOICE & LITERACY

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-190 - WASTE-TO-RESOURCE

Garden	Ground Production Garden
Learning objective	Use the Ground Production Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 10 - Discovery Production Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-191 - FOOD ORIGIN

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate food origin and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food origin task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-192 - HARVEST READINESS

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate harvest readiness and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe harvest readiness task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-193 - SAFE HANDLING

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate safe handling and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe safe handling task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-194 - SORTING & QUALITY

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate sorting & quality and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe sorting & quality task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-195 - FARM-TO-FOOD JOURNEY

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate farm-to-food journey and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe farm-to-food journey task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-196 - MEASUREMENT & YIELD

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate measurement & yield and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe measurement & yield task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-197 - STORAGE & LOSS

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate storage & loss and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe storage & loss task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-198 - PREPARATION PATHWAY

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate preparation pathway and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe preparation pathway task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-199 - FOOD CHOICE & LITERACY

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate food choice & literacy and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe food choice & literacy task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-200 - WASTE-TO-RESOURCE

Garden	Discovery Production Garden
Learning objective	Use the Discovery Production Garden to investigate waste-to-resource and connect crop production with food people recognize.
Materials	Student journal, crop/food picture cards, clean trays, ruler or scale where available, labels, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Observe the crop or production area. 2. Identify the edible plant part or food connection. 3. Complete a safe waste-to-resource task. 4. Record a count, measurement, drawing or sequence. 5. Explain the garden-to-food connection.
Evidence to record	Labeled sequence, tally, measurement, drawing or short explanation.
Farm-to-Food challenge	Identify one action that protects food quality or reduces waste.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?
