

Primary 4-6

FARM-TO-FOOD ACTIVITY SYSTEM

FF-201 to FF-300

PRODUCE -> HARVEST -> HANDLE -> MEASURE -> TRACE -> EXPLAIN

Purpose	Connect school-garden learning to food origin, harvest, handling, quality, preparation pathways, food literacy and waste reduction.
Food-safety boundary	These are education activities, not authorization for unrestricted tasting or processing. School food-safety rules and teacher supervision take priority.
Core learning chain	GARDEN -> CROP -> HARVEST -> HANDLE -> SORT/MEASURE -> PREPARE/PROCESS PATHWAY -> FOOD -> CHOICE -> WASTE/RESOURCE
Connections	Use with GrowMeal practical cards, journals, mission cards, vocabulary and assessment items.

GARDEN 01 - Raised Food Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-201 - FOOD ORIGIN

Garden	Raised Food Garden
Learning objective	Investigate food origin in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-202 - HARVEST READINESS

Garden	Raised Food Garden
Learning objective	Investigate harvest readiness in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-203 - SAFE HANDLING

Garden	Raised Food Garden
Learning objective	Investigate safe handling in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-204 - SORTING & QUALITY

Garden	Raised Food Garden
Learning objective	Investigate sorting & quality in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-205 - FARM-TO-FOOD JOURNEY

Garden	Raised Food Garden
Learning objective	Investigate farm-to-food journey in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-206 - MEASUREMENT & YIELD

Garden	Raised Food Garden
Learning objective	Investigate measurement & yield in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-207 - STORAGE & LOSS

Garden	Raised Food Garden
Learning objective	Investigate storage & loss in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-208 - PREPARATION PATHWAY

Garden	Raised Food Garden
Learning objective	Investigate preparation pathway in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-209 - FOOD CHOICE & LITERACY

Garden	Raised Food Garden
Learning objective	Investigate food choice & literacy in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-210 - WASTE-TO-RESOURCE

Garden	Raised Food Garden
Learning objective	Investigate waste-to-resource in the Raised Food Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 02 - Geometry Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-211 - FOOD ORIGIN

Garden	Geometry Garden
Learning objective	Investigate food origin in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-212 - HARVEST READINESS

Garden	Geometry Garden
Learning objective	Investigate harvest readiness in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-213 - SAFE HANDLING

Garden	Geometry Garden
Learning objective	Investigate safe handling in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-214 - SORTING & QUALITY

Garden	Geometry Garden
Learning objective	Investigate sorting & quality in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-215 - FARM-TO-FOOD JOURNEY

Garden	Geometry Garden
Learning objective	Investigate farm-to-food journey in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-216 - MEASUREMENT & YIELD

Garden	Geometry Garden
Learning objective	Investigate measurement & yield in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-217 - STORAGE & LOSS

Garden	Geometry Garden
Learning objective	Investigate storage & loss in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-218 - PREPARATION PATHWAY

Garden	Geometry Garden
Learning objective	Investigate preparation pathway in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-219 - FOOD CHOICE & LITERACY

Garden	Geometry Garden
Learning objective	Investigate food choice & literacy in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-220 - WASTE-TO-RESOURCE

Garden	Geometry Garden
Learning objective	Investigate waste-to-resource in the Geometry Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 03 - Grid Experiment Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-221 - FOOD ORIGIN

Garden	Grid Experiment Garden
Learning objective	Investigate food origin in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-222 - HARVEST READINESS

Garden	Grid Experiment Garden
Learning objective	Investigate harvest readiness in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-223 - SAFE HANDLING

Garden	Grid Experiment Garden
Learning objective	Investigate safe handling in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-224 - SORTING & QUALITY

Garden	Grid Experiment Garden
Learning objective	Investigate sorting & quality in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-225 - FARM-TO-FOOD JOURNEY

Garden	Grid Experiment Garden
Learning objective	Investigate farm-to-food journey in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-226 - MEASUREMENT & YIELD

Garden	Grid Experiment Garden
Learning objective	Investigate measurement & yield in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-227 - STORAGE & LOSS

Garden	Grid Experiment Garden
Learning objective	Investigate storage & loss in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-228 - PREPARATION PATHWAY

Garden	Grid Experiment Garden
Learning objective	Investigate preparation pathway in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-229 - FOOD CHOICE & LITERACY

Garden	Grid Experiment Garden
Learning objective	Investigate food choice & literacy in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-230 - WASTE-TO-RESOURCE

Garden	Grid Experiment Garden
Learning objective	Investigate waste-to-resource in the Grid Experiment Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 04 - Keyhole Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-231 - FOOD ORIGIN

Garden	Keyhole Garden
Learning objective	Investigate food origin in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-232 - HARVEST READINESS

Garden	Keyhole Garden
Learning objective	Investigate harvest readiness in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-233 - SAFE HANDLING

Garden	Keyhole Garden
Learning objective	Investigate safe handling in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-234 - SORTING & QUALITY

Garden	Keyhole Garden
Learning objective	Investigate sorting & quality in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-235 - FARM-TO-FOOD JOURNEY

Garden	Keyhole Garden
Learning objective	Investigate farm-to-food journey in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-236 - MEASUREMENT & YIELD

Garden	Keyhole Garden
Learning objective	Investigate measurement & yield in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-237 - STORAGE & LOSS

Garden	Keyhole Garden
Learning objective	Investigate storage & loss in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-238 - PREPARATION PATHWAY

Garden	Keyhole Garden
Learning objective	Investigate preparation pathway in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-239 - FOOD CHOICE & LITERACY

Garden	Keyhole Garden
Learning objective	Investigate food choice & literacy in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-240 - WASTE-TO-RESOURCE

Garden	Keyhole Garden
Learning objective	Investigate waste-to-resource in the Keyhole Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 05 - Compost Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-241 - FOOD ORIGIN

Garden	Compost Garden
Learning objective	Investigate food origin in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-242 - HARVEST READINESS

Garden	Compost Garden
Learning objective	Investigate harvest readiness in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-243 - SAFE HANDLING

Garden	Compost Garden
Learning objective	Investigate safe handling in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-244 - SORTING & QUALITY

Garden	Compost Garden
Learning objective	Investigate sorting & quality in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-245 - FARM-TO-FOOD JOURNEY

Garden	Compost Garden
Learning objective	Investigate farm-to-food journey in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-246 - MEASUREMENT & YIELD

Garden	Compost Garden
Learning objective	Investigate measurement & yield in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-247 - STORAGE & LOSS

Garden	Compost Garden
Learning objective	Investigate storage & loss in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-248 - PREPARATION PATHWAY

Garden	Compost Garden
Learning objective	Investigate preparation pathway in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-249 - FOOD CHOICE & LITERACY

Garden	Compost Garden
Learning objective	Investigate food choice & literacy in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-250 - WASTE-TO-RESOURCE

Garden	Compost Garden
Learning objective	Investigate waste-to-resource in the Compost Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 06 - Gravity Drip Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-251 - FOOD ORIGIN

Garden	Gravity Drip Garden
Learning objective	Investigate food origin in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-252 - HARVEST READINESS

Garden	Gravity Drip Garden
Learning objective	Investigate harvest readiness in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-253 - SAFE HANDLING

Garden	Gravity Drip Garden
Learning objective	Investigate safe handling in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-254 - SORTING & QUALITY

Garden	Gravity Drip Garden
Learning objective	Investigate sorting & quality in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-255 - FARM-TO-FOOD JOURNEY

Garden	Gravity Drip Garden
Learning objective	Investigate farm-to-food journey in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-256 - MEASUREMENT & YIELD

Garden	Gravity Drip Garden
Learning objective	Investigate measurement & yield in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-257 - STORAGE & LOSS

Garden	Gravity Drip Garden
Learning objective	Investigate storage & loss in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-258 - PREPARATION PATHWAY

Garden	Gravity Drip Garden
Learning objective	Investigate preparation pathway in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-259 - FOOD CHOICE & LITERACY

Garden	Gravity Drip Garden
Learning objective	Investigate food choice & literacy in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-260 - WASTE-TO-RESOURCE

Garden	Gravity Drip Garden
Learning objective	Investigate waste-to-resource in the Gravity Drip Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 07 - Vertical Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-261 - FOOD ORIGIN

Garden	Vertical Garden
Learning objective	Investigate food origin in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-262 - HARVEST READINESS

Garden	Vertical Garden
Learning objective	Investigate harvest readiness in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-263 - SAFE HANDLING

Garden	Vertical Garden
Learning objective	Investigate safe handling in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-264 - SORTING & QUALITY

Garden	Vertical Garden
Learning objective	Investigate sorting & quality in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-265 - FARM-TO-FOOD JOURNEY

Garden	Vertical Garden
Learning objective	Investigate farm-to-food journey in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-266 - MEASUREMENT & YIELD

Garden	Vertical Garden
Learning objective	Investigate measurement & yield in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-267 - STORAGE & LOSS

Garden	Vertical Garden
Learning objective	Investigate storage & loss in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-268 - PREPARATION PATHWAY

Garden	Vertical Garden
Learning objective	Investigate preparation pathway in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-269 - FOOD CHOICE & LITERACY

Garden	Vertical Garden
Learning objective	Investigate food choice & literacy in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-270 - WASTE-TO-RESOURCE

Garden	Vertical Garden
Learning objective	Investigate waste-to-resource in the Vertical Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 08 - Crop Rotation Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-271 - FOOD ORIGIN

Garden	Crop Rotation Garden
Learning objective	Investigate food origin in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-272 - HARVEST READINESS

Garden	Crop Rotation Garden
Learning objective	Investigate harvest readiness in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-273 - SAFE HANDLING

Garden	Crop Rotation Garden
Learning objective	Investigate safe handling in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-274 - SORTING & QUALITY

Garden	Crop Rotation Garden
Learning objective	Investigate sorting & quality in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-275 - FARM-TO-FOOD JOURNEY

Garden	Crop Rotation Garden
Learning objective	Investigate farm-to-food journey in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-276 - MEASUREMENT & YIELD

Garden	Crop Rotation Garden
Learning objective	Investigate measurement & yield in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-277 - STORAGE & LOSS

Garden	Crop Rotation Garden
Learning objective	Investigate storage & loss in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-278 - PREPARATION PATHWAY

Garden	Crop Rotation Garden
Learning objective	Investigate preparation pathway in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-279 - FOOD CHOICE & LITERACY

Garden	Crop Rotation Garden
Learning objective	Investigate food choice & literacy in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-280 - WASTE-TO-RESOURCE

Garden	Crop Rotation Garden
Learning objective	Investigate waste-to-resource in the Crop Rotation Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 09 - Water-Smart Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-281 - FOOD ORIGIN

Garden	Water-Smart Garden
Learning objective	Investigate food origin in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-282 - HARVEST READINESS

Garden	Water-Smart Garden
Learning objective	Investigate harvest readiness in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-283 - SAFE HANDLING

Garden	Water-Smart Garden
Learning objective	Investigate safe handling in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-284 - SORTING & QUALITY

Garden	Water-Smart Garden
Learning objective	Investigate sorting & quality in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-285 - FARM-TO-FOOD JOURNEY

Garden	Water-Smart Garden
Learning objective	Investigate farm-to-food journey in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-286 - MEASUREMENT & YIELD

Garden	Water-Smart Garden
Learning objective	Investigate measurement & yield in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-287 - STORAGE & LOSS

Garden	Water-Smart Garden
Learning objective	Investigate storage & loss in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-288 - PREPARATION PATHWAY

Garden	Water-Smart Garden
Learning objective	Investigate preparation pathway in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-289 - FOOD CHOICE & LITERACY

Garden	Water-Smart Garden
Learning objective	Investigate food choice & literacy in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-290 - WASTE-TO-RESOURCE

Garden	Water-Smart Garden
Learning objective	Investigate waste-to-resource in the Water-Smart Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

GARDEN 10 - Intro Soilless Garden

Ten activities move learners from identifying where food comes from to reasoning about handling, quality, loss, choices and resource recovery.

FF-291 - FOOD ORIGIN

Garden	Intro Soilless Garden
Learning objective	Investigate food origin in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food origin. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-292 - HARVEST READINESS

Garden	Intro Soilless Garden
Learning objective	Investigate harvest readiness in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about harvest readiness. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-293 - SAFE HANDLING

Garden	Intro Soilless Garden
Learning objective	Investigate safe handling in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about safe handling. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-294 - SORTING & QUALITY

Garden	Intro Soilless Garden
Learning objective	Investigate sorting & quality in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about sorting & quality. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-295 - FARM-TO-FOOD JOURNEY

Garden	Intro Soilless Garden
Learning objective	Investigate farm-to-food journey in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about farm-to-food journey. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-296 - MEASUREMENT & YIELD

Garden	Intro Soilless Garden
Learning objective	Investigate measurement & yield in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about measurement & yield. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-297 - STORAGE & LOSS

Garden	Intro Soilless Garden
Learning objective	Investigate storage & loss in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about storage & loss. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-298 - PREPARATION PATHWAY

Garden	Intro Soilless Garden
Learning objective	Investigate preparation pathway in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about preparation pathway. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-299 - FOOD CHOICE & LITERACY

Garden	Intro Soilless Garden
Learning objective	Investigate food choice & literacy in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about food choice & literacy. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?

FF-300 - WASTE-TO-RESOURCE

Garden	Intro Soilless Garden
Learning objective	Investigate waste-to-resource in the Intro Soilless Garden using measurable evidence and explain how production decisions affect food quantity, quality or handling.
Materials	Journal, labels, ruler/tape, balance where available, clean containers, tally sheet, calculator, handwashing supplies.
DIY / low-cost	Use locally available baskets, clean reused food-grade containers, handmade labels, paper process cards and simple balances/measuring vessels where suitable.
Activity pathway	1. Frame a question about waste-to-resource. 2. Select samples. 3. Measure or classify evidence. 4. Record quantities and quality observations. 5. Trace the product through at least four farm-to-food stages. 6. Explain one risk, loss point or improvement.
Evidence to record	Data table plus process sequence, calculation or evidence-based explanation.
Farm-to-Food challenge	Recommend one practical change that could improve quality, handling efficiency or reduce loss.
Safety	No tasting unless the school has separately approved a supervised food activity. Wash hands before and after handling produce. Use only clean, teacher-approved samples and containers. Teachers control knives, heat, electrical equipment, chemicals and any processing machinery.
Journal connection	Record the evidence, sequence, measurement, process map or reflection in the level-appropriate GrowMeal journal.
Mission/assessment	Use the evidence to complete a related Garden Mission and assess knowledge, practical, data or problem-solving competence.

Reflection: Where could food quality be protected, waste reduced, or the garden-to-food connection explained more clearly?
