

Primary 4-6 FOOD SMART CHALLENGE SYSTEM

FSC-201 to FSC-300

QUESTION -> READ -> MEASURE -> COMPARE -> JUSTIFY

Purpose	Move learners from knowing facts to making evidence-based food, ingredient, resource and waste decisions.
Ten domains	Ingredients; food journeys; food choices; labels; meals; water; food waste; seasonality; storage/handling; food-system problem solving.
Evidence rule	Learners should show how they reached a decision. At higher levels, require data, criteria, uncertainty and trade-off reasoning.
Health/safety boundary	No medical or therapeutic claims. No tasting is required. School food-safety and allergy procedures take priority.
Resource connections	Use vocabulary, Ingredient Lab, Farm-to-Food activities, journals, mission cards and GrowMeal assessments as evidence sources.

CHALLENGE SET 01 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-201 - KNOW THE INGREDIENT

Scenario	A school team must improve a school garden. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-202 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a classroom food table. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-203 - MAKE A FOOD CHOICE

Scenario	A school team must improve a harvest basket. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-204 - READ THE LABEL

Scenario	A school team must improve a ingredient display. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-205 - PLAN A MEAL

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-206 - USE WATER WISELY

Scenario	A school team must improve a water station. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-207 - REDUCE FOOD WASTE

Scenario	A school team must improve a storage shelf. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-208 - THINK SEASONALLY

Scenario	A school team must improve a market basket. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-209 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a food journey map. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-210 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a school food-waste station. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 02 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-211 - KNOW THE INGREDIENT

Scenario	A school team must improve a classroom food table. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-212 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a harvest basket. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-213 - MAKE A FOOD CHOICE

Scenario	A school team must improve a ingredient display. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-214 - READ THE LABEL

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-215 - PLAN A MEAL

Scenario	A school team must improve a water station. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-216 - USE WATER WISELY

Scenario	A school team must improve a storage shelf. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-217 - REDUCE FOOD WASTE

Scenario	A school team must improve a market basket. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-218 - THINK SEASONALLY

Scenario	A school team must improve a food journey map. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-219 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a school food-waste station. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-220 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a school garden. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 03 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-221 - KNOW THE INGREDIENT

Scenario	A school team must improve a harvest basket. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-222 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a ingredient display. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-223 - MAKE A FOOD CHOICE

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-224 - READ THE LABEL

Scenario	A school team must improve a water station. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-225 - PLAN A MEAL

Scenario	A school team must improve a storage shelf. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-226 - USE WATER WISELY

Scenario	A school team must improve a market basket. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-227 - REDUCE FOOD WASTE

Scenario	A school team must improve a food journey map. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-228 - THINK SEASONALLY

Scenario	A school team must improve a school food-waste station. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-229 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a school garden. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-230 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a classroom food table. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 04 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-231 - KNOW THE INGREDIENT

Scenario	A school team must improve a ingredient display. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-232 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-233 - MAKE A FOOD CHOICE

Scenario	A school team must improve a water station. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-234 - READ THE LABEL

Scenario	A school team must improve a storage shelf. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-235 - PLAN A MEAL

Scenario	A school team must improve a market basket. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-236 - USE WATER WISELY

Scenario	A school team must improve a food journey map. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-237 - REDUCE FOOD WASTE

Scenario	A school team must improve a school food-waste station. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-238 - THINK SEASONALLY

Scenario	A school team must improve a school garden. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-239 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a classroom food table. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-240 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a harvest basket. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 05 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-241 - KNOW THE INGREDIENT

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-242 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a water station. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-243 - MAKE A FOOD CHOICE

Scenario	A school team must improve a storage shelf. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-244 - READ THE LABEL

Scenario	A school team must improve a market basket. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-245 - PLAN A MEAL

Scenario	A school team must improve a food journey map. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-246 - USE WATER WISELY

Scenario	A school team must improve a school food-waste station. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-247 - REDUCE FOOD WASTE

Scenario	A school team must improve a school garden. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-248 - THINK SEASONALLY

Scenario	A school team must improve a classroom food table. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-249 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a harvest basket. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-250 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a ingredient display. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 06 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-251 - KNOW THE INGREDIENT

Scenario	A school team must improve a water station. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-252 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a storage shelf. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-253 - MAKE A FOOD CHOICE

Scenario	A school team must improve a market basket. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-254 - READ THE LABEL

Scenario	A school team must improve a food journey map. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-255 - PLAN A MEAL

Scenario	A school team must improve a school food-waste station. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-256 - USE WATER WISELY

Scenario	A school team must improve a school garden. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-257 - REDUCE FOOD WASTE

Scenario	A school team must improve a classroom food table. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-258 - THINK SEASONALLY

Scenario	A school team must improve a harvest basket. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-259 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a ingredient display. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-260 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 07 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-261 - KNOW THE INGREDIENT

Scenario	A school team must improve a storage shelf. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-262 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a market basket. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-263 - MAKE A FOOD CHOICE

Scenario	A school team must improve a food journey map. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-264 - READ THE LABEL

Scenario	A school team must improve a school food-waste station. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-265 - PLAN A MEAL

Scenario	A school team must improve a school garden. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-266 - USE WATER WISELY

Scenario	A school team must improve a classroom food table. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-267 - REDUCE FOOD WASTE

Scenario	A school team must improve a harvest basket. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-268 - THINK SEASONALLY

Scenario	A school team must improve a ingredient display. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-269 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-270 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a water station. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 08 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-271 - KNOW THE INGREDIENT

Scenario	A school team must improve a market basket. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-272 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a food journey map. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-273 - MAKE A FOOD CHOICE

Scenario	A school team must improve a school food-waste station. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-274 - READ THE LABEL

Scenario	A school team must improve a school garden. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-275 - PLAN A MEAL

Scenario	A school team must improve a classroom food table. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-276 - USE WATER WISELY

Scenario	A school team must improve a harvest basket. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-277 - REDUCE FOOD WASTE

Scenario	A school team must improve a ingredient display. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-278 - THINK SEASONALLY

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-279 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a water station. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-280 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a storage shelf. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 09 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-281 - KNOW THE INGREDIENT

Scenario	A school team must improve a food journey map. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-282 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a school food-waste station. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-283 - MAKE A FOOD CHOICE

Scenario	A school team must improve a school garden. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-284 - READ THE LABEL

Scenario	A school team must improve a classroom food table. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-285 - PLAN A MEAL

Scenario	A school team must improve a harvest basket. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-286 - USE WATER WISELY

Scenario	A school team must improve a ingredient display. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-287 - REDUCE FOOD WASTE

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-288 - THINK SEASONALLY

Scenario	A school team must improve a water station. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-289 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a storage shelf. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-290 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a market basket. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

CHALLENGE SET 10 - REAL-WORLD FOOD SMART DECISIONS

This set contains one challenge from each Food Smart domain. Teachers may run them individually, as stations, or as a term challenge sequence.

FSC-291 - KNOW THE INGREDIENT

Scenario	A school team must improve a school food-waste station. The team asks you to solve a know the ingredient problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-292 - BUILD A FOOD JOURNEY

Scenario	A school team must improve a school garden. The team asks you to solve a build a food journey problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-293 - MAKE A FOOD CHOICE

Scenario	A school team must improve a classroom food table. The team asks you to solve a make a food choice problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-294 - READ THE LABEL

Scenario	A school team must improve a harvest basket. The team asks you to solve a read the label problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-295 - PLAN A MEAL

Scenario	A school team must improve a ingredient display. The team asks you to solve a plan a meal problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-296 - USE WATER WISELY

Scenario	A school team must improve a school lunch scenario. The team asks you to solve a use water wisely problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-297 - REDUCE FOOD WASTE

Scenario	A school team must improve a water station. The team asks you to solve a reduce food waste problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-298 - THINK SEASONALLY

Scenario	A school team must improve a storage shelf. The team asks you to solve a think seasonally problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-299 - STORE & HANDLE RESPONSIBLY

Scenario	A school team must improve a market basket. The team asks you to solve a store & handle responsibly problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____

FSC-300 - SOLVE A FOOD-SYSTEM CHALLENGE

Scenario	A school team must improve a food journey map. The team asks you to solve a solve a food-system challenge problem using evidence rather than guesswork.
Your challenge	Define the question, collect/read relevant evidence, make at least one calculation or structured comparison, identify a limitation and justify the preferred action.
Evidence to submit	Evidence table, calculation/graph where appropriate, decision and justification.
Success criteria	Fair comparison; correct units/reading; evidence supports conclusion; limitation is acknowledged.
Extension	Propose a second option and state what evidence would make you change your decision.
Safety	Use only teacher-approved materials. No tasting is required. Follow school rules for food handling, allergies, handwashing and sanitation. Teachers control knives, heat, electrical equipment, chemicals and processing machinery.
AgriShine connection	Use a garden observation, crop/ingredient example, practical result or journal record wherever it strengthens the decision.
Assessment connection	Score primarily under mission-based problem solving, with supporting knowledge, practical or investigation/data evidence as appropriate.

Decision: _____

Evidence/reason: _____
