

SSS 1-3 Advanced Soilless Garden Flashcards 901-920

901. SYSTEM ARCHITECTURE	Soilless system architecture defines reservoirs, pumps, delivery lines, root zon...
902. NUTRIENT SOLUTION RECIPE	A nutrient-solution recipe specifies target concentrations of essential mineral ...
903. STOCK SOLUTION	A stock solution is a concentrated nutrient mixture diluted to produce the final...
904. CONCENTRATION	Solution concentration can be expressed in mass per volume, molar units, or othe...
905. pH MANAGEMENT	pH management maintains solution acidity or alkalinity within an appropriate ope...
906. ELECTRICAL CONDUCTIVITY	Electrical conductivity is an operational indicator of dissolved ionic concentra...
907. SOURCE WATER	Source-water chemistry contributes dissolved ions and alkalinity that influence ...
908. ALKALINITY	Alkalinity describes water's acid-neutralizing capacity and strongly influences ...
909. DISSOLVED OXYGEN	Dissolved oxygen is oxygen present in solution and is required for healthy root ...
910. ROOT-ZONE TEMPERATURE	Root-zone temperature affects respiration, oxygen solubility, nutrient uptake, a...
911. FLOW RATE	Flow rate influences nutrient transport, oxygen delivery, residence time, and hy...
912. RESIDENCE TIME	Hydraulic residence time describes how long solution remains within a defined ta...
913. RECIRCULATION RATE	Recirculation rate describes how frequently system solution is moved through the...
914. MAKE-UP WATER	Make-up water replaces solution volume lost through crop uptake, evaporation, sa...
915. NUTRIENT BALANCE	A nutrient balance tracks nutrient inputs, plant uptake, solution storage, disch...
916. SOLUTION MONITORING	Solution monitoring integrates pH, EC, temperature, dissolved oxygen, level, and...
917. SENSOR DRIFT	Sensor drift is a gradual change in instrument response that can create biased r...
918. ROOT HEALTH	Root-health assessment considers color, branching, odor, texture, disease sympto...
919. TROUBLESHOOTING MATRIX	A troubleshooting matrix links symptoms and measurements to plausible causes and...
920. SOILLESS OPTIMIZATION	Soilless optimization balances crop performance, nutrient solution, water, energ...
