

SSS 1-3 Crop Trial Garden Flashcards 821-840

821. TRIAL OBJECTIVE	A crop trial evaluates a defined treatment, variety, practice, or system using p...
822. NULL HYPOTHESIS	A null hypothesis states that there is no specified treatment effect or differen...
823. ALTERNATIVE HYPOTHESIS	An alternative hypothesis states the treatment effect or difference that compete...
824. TREATMENT STRUCTURE	Treatment structure defines the factors, levels, and combinations being evaluated.
825. EXPERIMENTAL UNIT	The experimental unit is the smallest unit independently receiving a treatment a...
826. REPLICATION	Replication provides independent observations of treatment conditions and suppor...
827. RANDOMIZATION	Randomization assigns treatments by chance to reduce systematic bias and support...
828. BLOCK DESIGN	Blocking groups relatively similar experimental units so known spatial variation...
829. SAMPLING UNIT	A sampling unit is the plant, quadrat, fruit, leaf, or other unit actually measu...
830. RESPONSE VARIABLE	A response variable is the measured outcome used to evaluate treatment effects.
831. COVARIATE	A covariate is a measured variable not assigned as a treatment that may help exp...
832. STANDARDIZED PROTOCOL	Standardized protocols reduce measurement differences caused by inconsistent pro...
833. DATA DISTRIBUTION	A data distribution describes the observed pattern, center, spread, and frequenc...
834. MEAN & STANDARD DEVIATION	The mean summarizes central tendency while standard deviation describes dispersi...
835. STANDARD ERROR	Standard error describes uncertainty in an estimated mean and depends on variabi...
836. CONFIDENCE INTERVAL	A confidence interval gives a range of plausible values for an estimated populat...
837. EFFECT SIZE	Effect size quantifies the magnitude of a treatment difference or relationship r...
838. STATISTICAL SIGNIFICANCE	Statistical significance evaluates data against a specified statistical model an...
839. TRIAL LIMITATION	Trial limitations include design, sample size, measurement, duration, environmen...
840. TRIAL RECOMMENDATION	A trial recommendation should reflect effect magnitude, uncertainty, feasibility...
