

QUESTION DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to question according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-371 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

HYPOTHESIZE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to hypothesize according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-372 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

TEST DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to test according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-373 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

REPLICATE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to replicate according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-374 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MEASURE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to measure according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-375 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

QUANTIFY DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to quantify according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-376 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

ANALYZE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to analyze according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-377 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

DIAGNOSE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to diagnose according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-378 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

MANAGE DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to manage according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.

RECOMMEND DEMONSTRATION

JSS 1-3 | Soilless Learning Garden

SET UP

Prepare hypothesis, variables, treatment/comparison, replicates and QC for solution and root-zone dynamics. Assign sample/instrument IDs.

DEMONSTRATE

Demonstrate how to recommend according to protocol, including raw-data recording and one quality-control check.

ASK

What is the hypothesis? Which variable is the response? Why replicate? What is the effect? What uncertainty qualifies the conclusion?

TD-380 | OBSERVE -> CHECK -> CLOSE

OBSERVE

Check protocol fidelity, traceable raw data, units, replicate handling, analysis and scientific integrity.

CHECK LEARNING

Student quantifies the response, identifies variation/uncertainty and makes a qualified conclusion or management recommendation.

CLOSE

Review abnormal readings without deleting them, connect evidence to management, secure instruments and record follow-up.

LINK THE LEARNING

Record evidence in the GrowMeal journal -> assign the related Garden Mission Card -> use the matching practical/data/problem-solving assessment item.
